

# Операционные системы

Командная оболочка Midnight Commander

---

Данил Артёмов

23 марта 2025

Российский университет дружбы народов, Москва, Россия

## Цели и задачи работы

---

Ознакомление с файловой системой Linux, её структурой, именами и содержанием каталогов. Приобретение практических навыков по применению команд для работы с файлами и каталогами, по управлению процессами, по проверке использования диска и обслуживанию файловой системы.

- 1 Изучить возможности Midnight Commander
- 2 Изучить редактор Midnight Commander

## Процесс выполнения лабораторной работы

---

A screenshot of the Midnight Commander file manager interface. The title bar shows the user 'mc [dsartemov@dsartemov]:~ /work/study/2024-2025/Операционные системы/os-intro — /usr/bin/mc'. The current directory is '~ /work/study/2024-2025/Операционные системы/os-intro'. The selected file is '/home/dsartemov/work/study/2024-2025/Операционные системы/os-intro/package.json' with a size of 362 bytes. The file's content is displayed in a blue-themed editor window, showing a JSON object for a package named 'os-intro' with version '1.0.0', a description, main file 'index.js', repository, author, license, and a commitizen configuration.

```
{
  "name": "os-intro",
  "version": "1.0.0",
  "description": "Git repo for educational purposes",
  "main": "index.js",
  "repository": "git@github.com:Danil28102004/os-intro.git",
  "author": "Danil28102004",
  "license": "CC-BY-4.0",
  "config": {
    "commitizen": {
      "path": "cz-conventional-changelog"
    }
  }
}
```

Рис. 10: Просмотр содержимого текстового файла

The screenshot shows the Midnight Commander (MC) interface. The title bar at the top reads "mc [dsartemov@dsartemov]:~/work/study/2024-2025/Операционные системы/os-~/work/study/2024-2025/Операционные системы/os-intro". The main window displays the content of the "package.json" file. The status bar at the top of the editor shows "package.json [----] 0 L: [ 1+14 15/ 15] \*(362 / 362b) <EOF>". The file content is as follows:

```
{
  "name": "os-intro",
  "version": "1.0.0",
  "description": "Git repo for educational purposes",
  "main": "index.js",
  "repository": "git@github.com:Danil28102004/os-intro.git",
  "author": "Danil28102004",
  "license": "CC-BY-4.0",
  "config": {
    "commitizen": {
      "path": "cz-conventional-changelog"
    }
  }
}....
```

```
mc.ext.ini [----] 0 L:[ 1+ 0 1/1136 ]*(0 /26909b) 0035 0x023 [*][X]
# Midnight Commander 4.0 extension file

# Warning: The structure of this file has been completely changed with the version 4.0!
#
# All lines starting with # or empty lines are ignored.
#
# IMPORTANT: mc scans this file only upon first use or after editing it using the
# mc "Edit extension file" command (F9-c-e). If you edit this file in any other way
# while mc is running, you will need to press F9-c-e and exit the editor for your
# changes to take effect, or exit mc and start it again.
#
# Section name can be anything with following exceptions:
#   there are two reserved section names:
#       mc.ext.ini
#       Default
#   special name pattern:
#       Include/xxxxx
# See below for more details.
#
# Section [mc.ext.ini] is mandatory. It contains file metadata.
# "Version" parameter is mandatory. It contains the file format version.
#
# Section [Default] is optional. It is applied only if no other match was found.
#
# Sections like [Include/xxxx] can be referenced as "Include=xxxx" from other sections.
# Section [Include/xxxx] can be located as before as after sections that point to it.
#
# Sections are processed from top to bottom, thus the order is important.
# If there are more than one sections with the same name in this file, the first
# section will be used.
#
# [Default] should be a catch-all action and come last.
```

Рис. 17: Просмотр файла расширений

A screenshot of the Midnight Commander file manager's menu system. The window title is 'menu' with standard window controls. The menu is open, showing a list of options. At the top, it says 'shell\_patterns=0'. The menu items include: '%%' (The % character), '%f' (The current file), '%p' (The current file), '%d' (The current working directory), '%s' (Selected files), '%t' (Tagged files), '%u' (Tagged files), '%view' (Runs commands), and a section for format letters (ascii, hex, nroff, uniform). Below this, there are two sections for macros: one for the current file (starting with '! t t') and one for tagged files (starting with 't t'). The bottom of the window shows a status bar with 10 numbered buttons: 1.Помощь, 2.Сохранить, 3.Блок, 4.Замена, 5.Копия, 6.Перем-тить, 7.Поиск, 8.Удалить, 9.МенюМС, 10.Выход.

```
menu [=====] 1 L:[ 1*16 17/370] *(732 /11821b) 0010 0x00A [*)(X)]
shell_patterns=0

#####
# %% The % character
# %f The current file (if non-local vfs, file will be copied locally and
#      %f will be full path to it)
# %p The current file
# %d The current working directory
# %s "Selected files"; the tagged files if any, otherwise the current file
# %t Tagged files
# %u Tagged files (and they are untagged on return from expand_format)
# %view Runs the commands and pipes standard output to the view command
# If %view is immediately followed by '{', recognize keywords
#      ascii, hex, nroff and uniform
#
# If the format letter is in uppercase, it refers to the other panel
#
# With a number followed the % character you can turn quoting on (default)
# and off. For example:
# %f quote expanded macro
# %!f ditto
# %0f don't quote expanded macro
#####

+ ! t t
@ Do something on the current file
  CMD=%{Enter command}
  $CMD %f

+ t t
@ Do something on the tagged files
  CMD=%{Enter command}
  for i in %t ; do

1.Помощь 2.Сохранить 3.Блок 4.Замена 5.Копия 6.Перем-тить 7.Поиск 8.Удалить 9.МенюМС 10.Выход
```

## Выводы по проделанной работе

---

В данной работе мы ознакомились с инструментами поиска файлов и фильтрации текстовых данных. А также приобрели практические навыки по управлению процессами.
